EXPERIENCE

IHConcept

Junior Web Developer (Project-Based)

JANUARY 2026 – Present

- Successfully managed project timelines and delivered responsive, intuitive webpages for clients using **WordPress**, demonstrating independence in project execution.
- Collaborated cross-functionally with teams from different departments to define project scope and ensured effective communication with clients throughout the development lifecycle.
- Developed and customized complex WordPress themes, utilizing PHP for back-end logic alongside HTML, CSS, and JavaScript to build highly interactive front-end experiences.

Web Developer/Designer Intern

SEPTEMBER 2025 – JANUARY 2026

- Managed and maintained company web pages using the **WordPress Content Management System (CMS)**, customizing themes to ensure an intuitive interface for both end-users and administrative content publishers. Collaborated on design and UX decisions, enhancing navigation and layout, which improved site usability and boosted visitor engagement by 25%.
- Optimized site performance through custom CSS styling, front-end adjustments, and design improvements, reducing load times and increasing overall accessibility and user satisfaction.

Golden Flavors — Web & Graphic Designer (Freelance)

OCTOBER 2025 - CURRENT

- Designed and developed a responsive website for a local restaurant, showcasing their mission, vision, and menu while strengthening their digital presence, using **HTML**, **CSS/Tailwind**, and **JavaScript**.
- Created custom digital graphics, promotional website banners, and marketing vectors in **Adobe Photoshop**, **Illustrator**, and **Affinity** to support visual communications and digital marketing efforts.
- Enforced strict digital brand consistency across all web platforms, utilizing Figma to build wireframes and prototypes that accurately reflected the organization's visual identity and mission.

PROJECTS

CoHabit — UX Researcher & Designer

- Conducted extensive user and stakeholder research through interviews, surveys, and usability analysis to identify pain points.
- Analyzed UI/UX best practices and synthesized findings into actionable design insights.
- Created and redesigned wireframes and interactive prototypes aimed at improving user flow, accessibility, and overall experience.
